

Installing Your Multifunction to Additional Computers on Your Network

PIXMA MG6620 Mac OS

Preparing to Connect to the Network

Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Wireless Connection

Before connecting the machine to the network, the computer needs to be connected to the network. Make sure that configuration of the computer and access point or router is complete.

Preparing to Connect to the Network

Notes on Network Connection

• The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.

- In an office setup, consult your network administrator
- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.
- Place the machine and computer on the same network segment.

Software Installation

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. Installation time varies depending on the computer environment or the number of application software to be installed.

IMPORTANT

- Log on as the administrator (or a member of the Administrators group).
- Quit all running applications before installation.
- Do not switch users during the installation process.
- Internet connection may be required during the installation. Connection fees may apply. Consult the internet service provider.

• If the firewall function of your security software is turned on, a warning message may appear that Canon software is attempting to access the network. If such a warning message appears, set the security software to always allow access.

If your MG6620 has already been set up for on your wireless network, it is only necessary to install the software on the additional computer(s). The printer does not have to be reset and no additional settings need to be made.

To begin setup of your PIXMA MG6620 on your wireless network, you must first download the software to your computer. <u>Click here to download</u>.

After the file, mac-MG6600-1_0-mcd.dmg, has downloaded successfully, double-click it to start the install procedure. Click **Next** on the first screen. If prompted, enter the Administrative Password to continue.
